

Keep kids and pets safe

NEW IN : Full metal child resistant tins

We are pleased to present our next generation full metal CR-Tin. (CR certification pending). Fully recyclable child-resistant (CR) opaque tins for dry and semi-dry highly concentrated or enriched products, such as food supplements or hemp-derived products.

The tins protect flavor and maintain cannabis product and active ingredient integrity. They also are designed for safety: While the tins' lids are easily accessible for adults and senior citizens, accidental opening by children or pets is deterred via child-safe screw closure.

Advantages

- Keeps your product fresh
- Easy to fill manually
- Easy to open and reclose for adults
- Opaque
- Can be labeled or fully offset-printed
- Light and robust barrier
- Monomaterial and a 100% recyclable packaging without any loss of quality
