

Keep kids and pets safe

Customized child resistant tins individually printed

Recyclable child resistant (CR) tins for dry and semi-dry highly concentrated or enriched products, such as food supplements or hemp-derived products.

The new certified CR tins come in Ø 70 mm in three different heights that creates volumes of 50 ml (Mini), 100 ml (Midi) or 500 ml (Maxi) for dry and semi-dry products.

They are made of recyclable tinplate steel with a polypropylene (PP) plastic insert. It is certified according to the Code of Federal Regulations 16 CFR § 1,700.20.

We offer full color custom-printed tins from 20'000 pieces for your specific brand.

Fast delivery for small quantities

As a service for start-ups or test runs, we will stock CR Tins in Switzerland by fall 2018. It comes in metallic basic color for easy custom labelling. MOQ 500 pieces, disassembled. Delivered within Europe in one week.
