

Infant nutrition & milk powder

Infant nutrition & milk powder products for the best experience!

Why choose our tin packaging for infant nutrition?

- we take infant nutrition packaging serious
- intensive hygiene and quality standard management
- high quality 360° full protection cans
- easily equippable with your desired spoon or cup
- permanently recyclable (market recyclability rate 93%)
- durable and hygienically clean

The infant nutrition market, especially milk powder, is a high demanding market for packaging producers. As it requires very intensive hygiene and quality standards. We work according to the HACCP guideline and has BRC Packaging certification to back this up as a recommended accreditation. We fully understand what is necessary for the producers of infant nutrition and work closely together with the customer to give them what they need.
